EDUCATION

Thadomal Shahani Engineering College, Mumbai, India
Bachelor of Engineering (B.E.), Computer Science

2015

EXPERIENCE

BridgeAthletic — Mumbai, India (Remote)

Feb 2023 – Present

Full Stack Engineer

B2B SaaS platform for strength-and-conditioning coaches and athletic organizations, from independent trainers to enterprise programs.

- **Built the company's enterprise SSO/SCIM capability from the ground up** (SAML, Auth0, IDP-initiated login), taking it from architecture and audit through production rollout for 10+ enterprise clients, including professional sports organizations and universities such as Purdue and the University of Cincinnati.
- **Designed and shipped an automated data pipeline for a major professional sports league** (AWS S3 + Retool), replacing a fully manual weekly process for course/fine assignment and eliminating a recurring monthly workload for the Customer Success team.
- **Led release management and production incident response**, running deployment dry-runs and hotfixes, authoring root-cause postmortems for background-queue and job-priority failures, and regularly stepping in to lead releases when senior engineers were unavailable.
- **Owned architecture and delivery for 6+ third-party integrations** — including Garmin (OAuth2 wearables), Cronometer and Passio AI (nutrition/food-image recognition), Smartabase, GymAware, and WellnessLiving — from vendor evaluation through production handoff.
- **Redesigned the self-serve sign-up flow from 12 steps to 3** and added bot/fraud protection (reCAPTCHA v3), reducing onboarding friction to improve trial conversion.
- **Lead platform security initiatives:** authentication hardening, IAM access audits and key rotation, EU/EEA privacy and GDPR remediation, and proactive fraud prevention across user-facing flows.
- Collaborate cross-functionally with product, QA, design, and enterprise clients, translating complex technical problems into decisions for non-technical audiences.

Socialstar, Mumbai, India

Dec 2018 – Jan 2023

Full Stack Engineer

- Built a React single-page application from scratch into a platform for selling and managing programmes to B2C and B2B customers, owning the full React and Node.js codebase.
- Developed and deployed SPAs using React, Next.js, Firebase, TypeScript, and GraphQL, building CI/CD pipelines and connecting modular components to custom API requests.
- Gathered product research with stakeholders, created market-tested mock-ups, and mentored a junior developer to full proficiency over one year.

Studio Subu, Mumbai, India

Apr 2017 – Nov 2018

Web Developer

- Built static websites with HTML, CSS, and SASS, and dynamic WordPress sites with PHP for branding and digital-marketing clients.
- Delivered nonprofit websites for Habitat for Humanity India, Atma, 3-2-1 Foundation, Mann Deshi Foundation, and The Akanksha Foundation, collaborating with content and design teams.

- Designed marketable banners, logos, and icons, then took on web development to publish up to 5 of 10 daily websites for a high-volume web shop.

SELECTED PROJECTS

Freelance & Nonprofit Web Platforms — aapti.in, thedataeconomy.com, thedigitalpubliclab.com, solsarc.ngo, vacha.org.in, civicgameslab.com, and fwd.com. Designed, built, and launched end-to-end for civic-tech and nonprofit clients.
