2015

EXPERIENCE

BridgeAthletic - Full Stack Engineer

Feb 2023 – Present

- Build and scale a B2B SaaS platform for strength-and-conditioning professionals, coaches, and athletic organizations, serving clients from independent trainers to enterprise programs.
- Lead platform security initiatives, remediating vulnerabilities in user-facing flows, hardening authentication, and driving proactive fraud-prevention strategies.
- Drive performance optimization by auditing the product, diagnosing bottlenecks, and shipping fixes that improve speed, reliability, and scalability for a growing user base.
- Collaborate cross-functionally with product, QA, design, and business stakeholders to ship features from ideation to production, translating complex problems into decisions for non-technical audiences.

Socialstar - Full Stack Engineer

Dec 2018 – Jan 2023

- Built a React single-page application from scratch into a platform for selling and managing programmes to B2C and B2B customers, owning the full React and Node.js codebase.
- Developed and deployed SPAs using React, Next.js, Firebase, TypeScript, and GraphQL, building intuitive DevOps pipelines and connecting modular components to custom API requests.
- Gathered product research with stakeholders, created market-tested mock-ups, and mentored a junior developer to full proficiency over one year.

Studio Subu - Web Developer

Apr 2017 – Nov 2018

- Built static websites with HTML, CSS, and SASS, and dynamic WordPress sites with PHP for branding and digital-marketing clients.
- Delivered nonprofit websites for Habitat for Humanity India, Atma, 3-2-1 Foundation, Mann Deshi Foundation, and The Akanksha Foundation, collaborating with content and design teams.

Innovins Pvt. Ltd.- Junior Designer

Dec 2016 – Apr 2017

- Designed marketable banners, logos, and icons, then took on web development to publish up to 5 of 10 daily websites for a high-volume web shop.

SELECTED PROJECTS

Freelance & nonprofit web platforms: aapti.in, thedataeconomy.com, thedigitalpubliclab.com, solsarc.ngo, vacha.org.in, civicgameslab.com, and andfwd.com — built, designed, and launched end-to-end.
